

A Mini-POW About Mini-Camel

Like Corey Camel, Mini-Camel owns a banana grove.

But Mini-Camel's harvest consists of only 45 bananas, and Mini-Camel can carry at most 15 bananas at a time.

The marketplace where Mini-Camel's harvest can be sold is only 15 miles away. Like Corey, Mini-Camel also eats one banana during each and every mile he walks.

1. How many bananas can Mini-Camel get to market?
2. Explain how Mini-Camel achieves this result.
3. Discuss how this problem is related to *POW 10: Corey Camel*. Explain how this mini-POW could help you solve POW 10.

Note: Your POW write-up asks you to refer to your work on this activity, so you'll need to keep a copy of your notes from this mini-POW.
